

I strongly agree that the  
essence of the village  
should be protected  
It is a village and not  
a small town so we  
understand the need to  
not illuminate everything

DED ENV 3

"MUST" SHOULD READ  
"SHOULD ENCOURAGE"

~~WE~~ I.E. NOT BE  
MANDATORY

ENV 1

I agree with  
these policies

There is a dire  
need for recycling  
facilities in the  
actual village and not  
outside of. How do  
non drivers and elderly  
reach these.

Green spaces  
should be enhanced  
in positive ways -  
ie. planting community  
orchards with  
~~and~~ indigenous species  
of the area

ENV1-4

I think that these are  
all excellent policies.

ENV (2)

Largely irrelevant  
as utility providers  
have a duty to  
do this anyway.
